TECHNICAL SKILLS

BACK END DEVELOPMENT: NodeJs, Express, C++ , Java, Python

FRONT END DEVELOPMENT: ReactJs, Redux, Javascript, Tailwind, Bootstrap, NextJs, Html, CSS

MISCELLANEOUS: Amazon AWS, SQL, Prisma, DSA, MongoDB, Cyber Security

Libraries and Tools: Postman, Docker, Wordpress, PyTorch, Sklearn, Pandas, Numpy, OpenCV, Git

EDUCATION

MIT World Peace University
BTech, Computer Science Engineering
GPA: 8.67

Pune, Maharashtra, India
April, 2021 - 2025

EXPERIENCE

Video Editing

Freelancing

Jan 2022 - August 2023

- I have completed eight internships and some freelancing projects on video editing and graphic design.
- I have used software such as Final Cut Pro, Video Scribe, Adobe After Effects, Adobe Photoshop, Figma, and Canva according to the client's demands.
- While working on these projects, I was also learning web development and making projects.

PROJECTS

- **Portfolio**, I have built my own portfolio website, in which I have used ReactJs as the front end, CSS for styling, and React Hook Form for forms.
- **Freelancing**, As a freelancer, I have seen that websites like Fiver, Freelancer, and Upwork are not very user-friendly for Indians, and they all work in dollars, which we can withdraw using PayPal, but all of them charge a high commission in the era of UPI. So I have built a MERN Stack website to solve this problem.
- **Payment Website(MERN Stack)**, I have used all the concepts I had learned till that date, like middlewares, routes, async-await, express, mongoose, reactjs, tailwind, react, cors, axios, and many more, in this single project. [GitHub](#)

CERTIFICATION

- **Full Stack Development** with DevOps, System Design, Open Source by Harkirat singh
- **AWS on Udemy** - AWS EC2 : AWS Certified Solutions Architect - Associate by Mohammed Asif Khan
- **Data Structures and Algorithms** By Love Babbar
- **SQL on udemy** - Mastering SQL using Postgresql By Durga Viswanatha Raju Gadiraju
- **Python on Udemy**

INTERESTS

- Fitness
- Trekking
